

WIRSBO pro Series Cross Reference

Uponor (formerly Wirsbo) has recently decided to discontinue a number of pro Series controls and thermostats. These models can be easily interchanged with current tekmar controls and require minimal or no alterations to the existing system. In many cases, the tekmar model will offer additional features such as indoor sensor options and boiler load reset. This serves to improve system efficiency and increase energy savings.

The following chart outlines the affected Wirsbo models and suggested tekmar upgrades.

Wirsbo Discontinued Product	tekmar Controls Upgrade Model
proMix 101	360 Mixing Control
proMix 201	361 Mixing Control
proMix 212 (no snow melt)	374 Universal Reset Control
proMix 212 (with snow melt)	362 Mixing Control (<i>two required</i>)
SYSTEMpro 311	374 or 364 Universal Reset Control
SNOWpro 411	667 Snowmelt Control
Set-Point 501	507 Thermostat
Set-Point 501s	509 Thermostat (includes sensor)
