

tN4 Gateway 483

Software Version J1193G

The tN4 Gateway 483 software version J1193G is available today. It includes many new features and improvements. Key feature improvements include:

- New Graphs page. Graph any boiler, mixing, outdoor or thermostat temperature over any time period.
- New user interface. An updated look and feel to each webpage.
- Improved email configuration. AOL email service added and a new Test button allows you to instantly send an email to verify your email settings are correct.
- Enhanced email notifications. Emails now include site name and address to make monitoring several tN4 Gateways easy.
- Simplified installation. Download the new software and double click on the 'install' icon. The software is automatically installed in the correct location.
- New Data Brochure D 483. Now available at <http://www.tekmarcontrols.com>.

The new 483 software J1193G is a free download from the tekmar website at:
<http://www.tekmarcontrols.com/tn4/gateway.html>

If an updated CD is required, tekmar sales representatives can order new P036 CDs from tekmar.

To install the software:

- 1) Press the Quit button on the tN4 Gateway application's window and ensure the tN4 gateway application icon is no longer in the dock (bottom of screen).
- 2) Double click the CD or the downloaded DMG file.
- 3) Double click the 'install' icon.
- 4) Select 'Yes' when the dialog box asks 'Would you like to install the tn4 Gateway software'.

More detailed instructions are available in the Data Brochure D483 if required.

Sincerely yours,

Jay Vath
